
Erratum

In the article by Geck, Dorey, Lawrence, and Johnson, entitled “Congenital Radius Deficiency: Radiographic Outcome and Survivorship Analysis” (J Hand Surg 1999;24A:1132-1144), the data presented in Table 1 are incorrect; specifically, the Ulnar bow at Final Follow-up was 20.6 ± 16.1 rather than 11.4 ± 16.1 . The corrected table appears below.

Table 1. Overall Deformity Correction Assessed in All Patients (29 Limbs in 23 Patients)

	<i>Preoperative Index</i>	<i>Immediate Postoperative Index</i>	<i>Final Follow-up</i>	<i>P Value</i>
Hand-forearm angle (°)	62.0 ± 26.0	3.8 ± 12.8	12.2 ± 19.8	.001
Hand-forearm position (mm)	-11.1 ± 5.6	13.0 ± 4.8	11.4 ± 7.8	.001
Ulnar bow (°)	29.8 ± 24.8	17.5 ± 17.5	20.6 ± 16.1	.065

Data are presented as mean values \pm SD. Eight patients needed revision. The p values are for preoperative values to final follow-up values for significance of correction.
