November 9-11, 1978
Functional rehabilitation of the disabled hand
Houston, Texas
Drs. Borrell, Epstein, Kessler, and Madden, course chairmen
Functional rehabilitation of the hand that is disabled by nontraumatic causes is based upon clinical assessment followed by appropriate surgical, physical, and occupational therapy. This course will concentrate on the management of these patients, including their evaluation and treatment. The program should be of interest to the hand surgeon, physiatrist, and occupational and physical therapist. Credit: 15 hours, category I.

November 16-18, 1978
Treatment of hand injuries
Detroit, Michigan
Robert D. Larsen, M.D., and Joseph L. Posch, M.D., course chairmen
This symposium will survey virtually the entire field of hand injuries, including trauma to nerve, tendon, bone, joint, vessels, and skin. The program is designed primarily for the general surgeon, orthopaedic surgeon, and plastic surgeon who may treat a wide variety of hand injuries, although his or her practice may not be devoted exclusively to surgery of the hand. Credit: 20 hours, category I.

As an organization accredited for continuing medical education, the American Society for Surgery of the Hand certifies that these continuing medical education activities meet the criteria for credit hours in category I of the Physician's Recognition Award of the American Medical Association.
