SUBJECT INDEX

- Acquired digital fibrokeratoma (ADFK), 131-133
Active contraction, graph. 50
Adam's weave, 17
Administrative databases, use of in research, 66
American Society for Surgery of the Hand, Sterling Bunnell
Traveling Fellowship report to, 69-77
American Society of the Hand membership survey on safety of
upper- extremity surgery after ipsilateral breast
cancer, 232-238
Anesthesia for tenolysis, 124
Angiofibroblastic hyperplasia, 141
Anterior oblique ligament (AOL), 117, 119
Arthritis, DRUJ
complications of distal ulnar resection, 26-27
distal ulnar resection, 26
etiology of, 222-223
implant arthroplasty, 27
Sauve-Kapandji procedure, 26
Arthrodesis, partial, for treatment of radiocarpal osteoarthritis
anatomy, 101
kinematics, 101-102
OA, 100-101
radiolunate fusion, 104-105
radioscaphoid arthrodesis, 102-104
radioscapholunate arthrodesis, 105-106
RSL arthrodesis plus distal scaphoidectomy, 107-108
fusion, 105
results, 107-108
symptoms, 101
treatment, 102
wrist motion, functional range of, 102
Arthroplasty, 43-44
debridement, 213
distraction fascial, 214
implant *see* Implant arthroplasty, DRUJ
Outerbridge-Kashiwagi, 213-214
total elbow, 214
Arthroscopic anatomy, 176-180
standard portals and, 180
surface anatomy, 176
Arthroscopic partial trapeziectomy and interposition arthro-
plasty of thumb carpometacarpal joint
CMC, 115-116
discussion, 121
surgical procedure, 116-121
bony recontouring, 120-121
portals used, 117, 118
Arthroscopic rotator cuff debridement (ARCD), 148, 150
Arthroscopic SAD (ASAD), 148, 150
Arthroscopy of elbow, 212
Artifacts of patient motion, 85
Benign soft tissue masses
ganglion cysts, 189-190
hemangiomas, 190
lipoma, 190

- neurogenic tumors, 190-191
- other vascular tumors, 190
- Bizarre parosteal osteochondromatous proliferation (BPOP), 183-185
- Blix curve, graph showing, 50
- Bone scintigraphy, 135-136
- Bony deficiency, acquired or developmental, 24
- Bournonniere deformity, 58-59
- Boyd exposure of proximal ulna and radius, 33-34
- Boyes preoperative classification, 125
- Breast cancer, ipsilateral, safety of upper-extremity surgery after, results of survey from American Society of the Hand membership, 232-238
- Brown recluse spider bite, 79

- CA ligament, 147
- Cable, rotator cuff, 142
- Calcifications, 45
- Calcinosis, 44
- Carpometacarpal (CMC) joint arthritis, arthroscopic evaluation of, 115-121
- Case control design in research, 65
- Chemical fat suppression, and MRI, 84-85
- Chondroblastoma, 112
- Chondromatous neoplasms, 112
- Claw hand deformity, 57, 59
- Clinical research, alternatives to randomized trials in
 - case-controlled studies, 63-64
 - case reports and case series, 63
 - cost of, 61
 - cross-sectional study, 64-65
 - decision analysis, 65-66
